ICC TRAINING & CERTIFICATION SUMMIT

May 22–26, 2017 | University of Texas at Arlington

The International Code Council's (ICC's) **Training and Certification Summit**, May 22–26, 2017 (TCS 2017) will be held at the University of Texas at Arlington. Held in conjunction with the 25th Building Professional Institute (BPI) educational program, ICC's Summit will provide four unique education tracks offered over a three day period. Then, on the fourth day, the certification track will culminate with an opportunity to take the corresponding ICC Certification exam. Additional certification exams will also be available.

Training for each track will be provided by ICC's national experts. This event is being positioned as a great opportunity to sharpen one's skills, expand one's code knowledge and help advance their career. In addition to being aligned with our Board's directives to expand leadership development opportunities and develop the next generation of code officials including guidance on mentoring, the tracks are designed to meet the most critical training needs of professionals from across the country.

TCS 2017 educational tracks include:
- The Leadership Institute
- The Building/Fire Safety Principles Institute
- Residential Building Inspector Certification Academy
- The Multigenerational Communications in the Workplace Institute

Special bundle pricing will be available on ICC's references and study guides to help participants to prepare to take the Certification exams and will provide an additional revenue stream for the event.

An eblast will go out on Thursday, July 14, and will refer people to the **ICC Training and Certification Summit** webpage.

About ICC: The International Code Council is a member-focused association. It is dedicated to developing model codes and standards used in the design, build and compliance process to construct safe, sustainable, affordable and resilient structures. Most U.S. communities and many global markets choose the International Codes.

About BPI: The 25th Anniversary of the Building Professional Institute (BPI) education event in Arlington, Texas, sponsored by Building Officials Association of Texas (BOAT) and the Construction Research Center University of Texas at Arlington, is scheduled each May on UT Arlington campus typically featuring up to 20 tracks of education and training classes for Building Professionals. BPI is an ICC Preferred Provider and BPI courses also satisfy license requirements for Electricians, Engineers, Architects, Surveyors, Code Enforcement, Fire Officials, Plumbers, and Planners. Registration for this event will be separate from the ICC Training and Certification Summit.
