A quorum requires 7 in attendance.			

Five committee members were in attendance, the meeting did not obtain a quorum. A general discussion of attendees occurred.

- b. ICC Staff: Kevin McOsker
- 2. Ryan brought up PC #62, which removes the word “accessible” for “reachable” noting a possible change that was heard at the code hearings. Although the term accessible means something specific in the IBC and some of the codes, it feels like an appropriate term here. The group on the call was unaware of change throughout the document. The Structural Work Group will propose a motion accordingly at the next meeting.
- 3. Ryan also discussed PC #187, which is a list of concrete reference standards for assessments and other associate documents from ACI. This is the only material represented.
- 4. PC #189 was suggested to be reviewed by the Building Elements Work Group, in lieu of the structural group.
