General Code Announces Partnership with Government Technology Expert Revize

The collaboration will empower local governments through ground-breaking municipal web platforms and applications

Rochester, New York – General Code®, a member of the [International Code Council!](#)® family of solutions, has reached a partnership agreement with [Revize](#) of Troy, Michigan. Revize is a recognized leader in providing custom government website design and content management software to municipalities nationwide.

The goal of the partnership is to develop high-value integrations between Revize municipal websites and web applications, and General Code platforms and content to help improve client and constituent efficiency and productivity.

“Together, we'll provide our clients with even more robust, efficient, and integrated user-friendly platforms to better serve their communities,” said Wayne Childs, Director of Business Development for General Code.

The partnership is a significant step forward for General Code as it fully rounds out an already impressive portfolio of digital solutions that the company currently offers its clients as a member of the Code Council family of solutions.

“A Revize website integrated with General Code’s eCode 360® online code platform will allow residents to get municipal code information instantly,” said Joseph Nagrant, Vice President of Sales, and Marketing for Revize. “When Revize builds a website, our very first concern is to make it easy for a web visitor to navigate to any subject in one click right from the home page. This partnership will allow us to extend additional engagement services that municipalities need to our existing clients. We are excited to accomplish this together with General Code.”

###

About General Code

A member of the International Code Council®’s Family of Solutions, General Code is a nationally recognized leader in codification. Our custom code-centric digital solutions enhance how municipal,

building and zoning code information is presented, accessed, and integrated with a local government's own array of existing systems. Currently General Code serves more than 4,000 communities in 43 states. For more information, visit generalcode.com.

About Revize

Founded in 1995, Revize designs and builds beautiful, reliable, and accessible websites for government municipalities across the country while maintaining excellent customer service, ADA compliance, and security. Revize's innovative custom web design, content management system, and a suite of web applications create a whole new digital experience for customers while helping them engage effectively with their constituents. For more information, visit revize.com.
