ICC Community Development Solutions Announces Integration with Avolve Software to Enhance Government Permitting Processes

This integration provides another service to customers to expand the International Code Council offerings

Rochester, New York– ICC Community Development Solutions (ICC CDS) and Avolve Software announced an integration to provide public sector jurisdictions with a comprehensive, end-to-end ePermitting and plan review solution. This collaboration aims to streamline permitting processes, enhance efficiency and deliver exceptional service to government agencies throughout North America.

Avolve's plan review software, DigEplan, is designed for government permitting, providing a fully integrated, easy-to-use electronic plan review solution that automates and streamlines permitting services with Municity.

The agreement between Avolve Software and ICC CDS addresses the increasing demand for efficient community development services. This integration eliminates redundant workflows and manual processes, significantly enhancing productivity and reducing complexity in permit issuance.

"We are thrilled to work with Avolve to bring their leading electronic plan review solution to more government agencies within our Municity Permitting and Code Enforcement program," said Dan Foster, General Manager at ICC Community Development Solutions. "This relationship underscores our commitment to providing innovative, efficient and integrated solutions that meet the evolving needs of our public sector customers."

"Our commitment to providing outstanding service to our customers is reflected in our partnership with ICC CDS Software," shared Derek Porter, Chief Growth Officer at Avolve Software. "We are thrilled to integrate DigEplan with Municity and offer governments a powerful tool to improve community development services efficiently."

ICC CDS and Avolve will provide an overview of this integration during a webinar taking place on Thursday, July 11, 2024, at 1:00 P.M. ET. Register for the webinar here.

###
