Proposal #	Proposal Description	Proponent Name	SC Member Reviewing	Discussion and Reason	Motion	Vote
REPI-064-21	limit air leakage	William Fay	Greg Johnson, Tom Taylor, Gayathri Vijayakumar	Heard as modified, presented by Gayathri, confirmation does not conflict with REPI-60 as passed, straw proposal on air leakage values	Chris Mathis moves as modified, Rob Buchanan seconded Reason: air leakage tightness is essential to energy efficiency	13-4-1
REPI-063-21	limit air leakage	William Fay	Greg Johnson, Ryan Abendroth	Aims to limit air leakage in warmer climates, some discussion on whether it should be even lower.	Alison Lindberg motions to approve and Joel Martell seconded Reason: controlling air leakage is important in warm climates as well. Vote 14-1-3 - motions carries	14-1-3

CEPI-066-21 Part II		Theresa Weston	Mike Browne, Clifford Davis	Withdrawn by proponent		
REPI-038-21	rim joist leakage	Robby Schwarz	Charlie Allen, Clifford Davis	rim joists are under insulated	Motion to disapprove Bobby Parks, Rob Austin Reason: Repetitive and unnecessary. The language "six-sided" is a concept, not good code language	10-5-3
REPI-039-21	knee wall	Robby Schwarz	Matt Brown, Bill Pousson	provides more details on how to insulate knee walls, adds additional clarity for these spaces	Motion to approve Rob Buchanan, Chris Mathis seconded Reason: Repetitive and unnecessary. The language "six-sided" is a concept, not good code language	10-8-0
REPI-005-21	CO2-eq defined	Seth Wiley	Mike Browne/Lee Fithian	addresses carbon directly, adds definition of carbon equivalent	motion to disapprove Greg Johnson, Amanda Hickman Reason: There is nothing for the CEO to do with this information. The information will be inaccurate as the electric grid becomes cleaner.	12-6
REPI-044-21	update Appendix A	Charles Haack	Craig Drumheller, Ben Rabe	Proponent says proposal is not ready at this time	Motion to disapprove Parks, Johnson Seconded Reason: Proponent says not ready	18-0

CEPI-019-21 Part II	R value specified	Darren Meyers	Robert Austin, Ryan Abendroth	approved by commercial SC, heard as modified	Charles Allen Motion to approve as modified, Abendroth seconded Reason: simply a clarification that R value is visible	17-0-1
REPI-056-21	polyurethane installation requirements	Mark Lyles	Amanda Hickman, Rob Austin	Proponent: modified, closer to grade 1 level of performance, pull language form Title 24	Bobby Parks motion to disprove, Greg Johnson seconded Reason: Good info but mostly installation instructions rather than code language. Some of the language used such as "without voids" is problematic.	12-4-1
