The International Code Council's PMG Newsletter

June 25, 2024

Welcome!

This newsletter is part of a continuous series released bi-monthly by the International Code Council's Plumbing, Mechanical and Fuel Gas (PMG) Technical Resources Team. From the latest developments in Code Council initiatives within the [PMG space](#), to industry news spanning the globe, this newsletter will help you stay in the know.

Feedback and editorial suggestions can be sent to Jim Cika, Director, PMG Technical Resources, at jcika@iccsafe.org. For advertising information, please email Matt Sigler, PMG Executive Director, at msigler@iccsafe.org.

The Latest from the PMG Team

EPA's Technology Transitions Program Related to A2L Refrigerants in the Built Environment

In this article we will cover the second program EPA has enacted, the Technology Transitions Program, as it applies to residential and commercial HVAC systems.

Highlighting the Latest International Plumbing Research from Australia

Staying up-to-date with the latest plumbing research and academic findings can be challenging. Here we highlight the work of two prominent Australian universities. First, Dr. Harriet Whiley from Flinders University shares new insights into managing the risk of Legionella in plumbing systems. Then, we will delve into water demand research conducted by Mr. Brendan Josey from Deakin University.
