Legislative draft for First Ballot

Proposals Feb. 24, 2022 through Jan. 19, 2023

Where a section or figure is revised, it is preceded by the change number. The highlight color on the change number is coordinated with the highlight color on the revision. Typically, the highlight color for the change is **yellow** or **blue**. Where two proposal changes the same text, the color will be **green**. The revisions are shown in legislative format (underline for new, strikeout for deletion). **Red** text is for items not related to changes, such as automatic renumbering and correlation items.

For comments on the ballot, proposed modifications should be shown assuming that the proposal was fully accepted, so it is clear what the additional modifications are.

This draft includes all errata to the 2017 edition.

CHAPTER 1
APPLICATION AND ADMINISTRATION

SECTION 101
TITLE

101.1 General. This document shall be known as the standard for Accessible and Usable Buildings and Facilities, hereinafter referred to as “this standard.”

SECTION 102
PURPOSE

01-01 2021 AS

102.1 General. The technical criteria in Chapters 3 through 10, Sections 1102, 1103 and 1106 of this standard make sites, facilities, buildings and elements accessible to and usable by people with such physical disabilities as the inability to walk, difficulty walking, reliance on walking aids, blindness and visual impairment, deafness and hearing impairment, incoordination, reaching and manipulation disabilities, lack of stamina, difficulty interpreting and reacting to sensory information, and extremes of physical size. The intent of these sections is to allow a person with a physical disability to independently get to, enter, and use a site, facility, building or element.

The intent of Sections 611(Assisted toileting and bathing) and 613 (Adult changing stations) is to allow for assistance by a care giver where a person may not be able to independently use toileting or bathing facilities.

Section 1104 of this standard provides criteria for Type B units. These criteria are intended to be consistent with the intent of the criteria of the U.S. Department of Housing and Urban Development (HUD) Fair Housing Accessibility Guidelines. The Type B units are intended to supplement, not replace, Accessible units or Type A units as specified in this standard.

Section 1105 of this standard provides criteria for minimal accessibility features for one and two family dwelling units and townhouses which are not covered by the U.S. Department of Housing and Urban Development (HUD) Fair Housing Accessibility Guidelines.

This standard is intended for adoption by government agencies and by organizations setting model codes to achieve uniformity in the technical design criteria in building codes and other regulations.

102.2 Applicability. Sites, facilities, buildings, and elements required to be accessible by the scoping provisions adopted by the administrative authority shall comply with the applicable provisions of Chapters 3 through 10. Dwelling units and sleeping units shall comply with the applicable provisions of Chapter 11.

SECTION 103
HUMAN FACTOR PROVISIONS

103.1 General. The technical criteria in this standard are based on body sizes and functional abilities of adults and, in those sections where specifically noted, children.

SECTION 104 COMPLIANCE ALTERNATIVES

104.1 General. Nothing in this standard is intended to prevent the use of designs, products or technologies as alternatives to those prescribed by this standard, provided they result in equivalent or greater accessibility and such equivalency is approved by the administrative authority adopting this standard.

SECTION 105 CONVENTIONS

105.1 General. Where specific criteria of this standard differ from the general criteria of this standard, the specific criteria shall apply.

105.2 Calculation of percentages. Where the determination of the required size or dimension of an element or facility involves ratios or percentages, rounding down for values less than one half shall be permitted.

105.3 Dimension tolerances. All dimensions are subject to conventional industry tolerances except where the requirement is a range with stated minimum and maximum end points.

105.4 Figures. Unless specifically stated, figures included herein are provided for informational purposes only and are not considered part of the standard.

NRC_{Ceiling} = NRC rating of the ceiling finish material

S_{Ceiling} = ceiling area in square feet

NRC_{Wall} = NRC rating of the wall acoustical treatment

S_{Wall} = wall treatment area in square feet

Volume = room volume in cubic feet

Where a floor, ceiling or wall has multiple surface finishes, the NRC x S product for each surface finish shall be added to the left side of the equation.
