Notes from 12-12-2022 -

Discussion of 02-12-22 –

Proposal 02-01-22

Agree with coordination intent. Did not want to use ‘tiered seating’ or ‘bleacher type’ seating because of confusion in scope with IBC assembly seating. In public comment agenda are three options:

- Use ‘seating governed by this standard’ instead of ‘bleacher-type’ or ‘tiered-seating’.
- Use ‘bleachers, folding and telescopic seating and grandstands’ throughout
- Use just ‘seating’ and specify that this applies to all three types unless noted otherwise.

However, committee still felt a need to clarify what is covered by this standard. The committee did not agree on adding 'building element' like the IBC as suggested in the 11/28 meeting. No alternative suggestions at this point. The committee did look at the code change proposals that added the definition to the 2009 IBC (E5-07/08 AS) and the changes to relocate the sway loads in the 2021 IBC (S53-19 AS and S58-19 AS).

Jake Pauls raised concerns about the scope of the ICC 300 and potential duplication or conflicts with assembly seating requirements in NFPA. Karl had explained the ANSI process for standards during a previous meeting.
