Proposals 04-07-21 and 04-08-21 were discussed during the May 2 meeting but no action was taken. Kim and Dan developed replacement proposals based on committee discussion. See the report for replacement proposals.

The committee discussed the replacement for 04-08-21. Based on the discussion Dan Victor asked for withdrawal of the proposal.

Discussion for 04-08-22: Type 2 handrail is currently only permitted in the IBC within individual dwelling units. Without further research, it is not apparent that this provides 'equivalent graspability' for assembly spaces. Additional research is needed. Jake Pauls provided a presentation demonstrating the differences between Type 1 and 2 handrails. The link to Jake Paul's stairway video is <https://vimeo.com/channels/1063550/586888866>

The committee reviewed the replacement for 04-07-22. This will be the discussion for the start

of the June 13, 2022.

See the updated public comment report for committee reasons.

The committee decided to finish the discussion on handrails and guards before moving back to accessible means of egress in proposal 04-01-21. That will include the discussions on 04-04 through 04-08. That will give people more time to come up with possible solutions for 04-01-21.
