

Campaign Resources

The ELMC and SMC are committed to having individuals ready to help chapters, regions and individual members develop challenges, social media blasts and content to help get out the vote for the next code cycle. During this coming year with no code hearings, we believe that it is the perfect opportunity to prepare for a full push to engage members in the vote and bring new professionals into the fold of code development. To that end we hope that the resources listed below help provide content and contacts for those who actively choose to challenge their fellow members to participate on cdpAccess and code development.
