

# Education and Training

The Colorado Chapter offers several opportunities throughout the year for education and continuing education credits (CEU'S). Bi-monthly chapter meetings are hosted by jurisdictions throughout the state and include education offerings.

The Chapter hosts a week long Educational Institute each year in March that is considered the premier educational event of its type in the country. The Educational Institute offers a wide variety of courses for code officials, building and fire department personnel as well as building contractors and design professionals.

Educational Institute faculty include some of the top instructors from throughout the country and cover topics ranging from technical code and engineering to customer service and legal aspects.

Both Chapter meetings and the Educational Institute offer great opportunities to stay up to date with current codes and ever changing construction processes and materials as well as the opportunity to earn CEU's towards certification renewal.

Our long-term goal is to familiarize and educate jurisdictions on the benefits of building safety.

The Colorado Chapter is an accredited member of the International Code Council.

#### MISSION STATEMENT

"The Colorado Chapter of the International Code Council is dedicated to the improvement of building safety by promoting and improving the International Codes, educating the building industry, public, our membership and providing mutual aid to building professionals."

# Colorado Chapter of the International Code Council

The nonprofit, volunteer, professional association for building department personnel.

# CCICC

## Purpose

The Colorado Chapter promotes and supports the ideals of the International Code Council by holding informative meetings, an educational institute and by participating in Code Hearings.

Meeting agendas include topics specifically designed to educate participants on the ICC Codes, keeping current on new products and technologies and providing a forum for open discussions in an informal setting. We strive to keep our members up-to-date on issues that directly impact building safety operations.

Our goal is to develop and improve professional skills and pursue uniformity. We strongly encourage certification through the ICC.

## Code Development

The Colorado Chapter is actively involved in the ongoing development of the International Codes. Committee members submit code change proposals and analyze other submitted proposals in an ongoing effort to help ensure that the International Codes reflect the latest technical advancements and address the concerns of those throughout the industry in a fair and equitable manner.

## Membership

Chapter membership is composed of individuals working for government agencies, Professional/Associates and students enrolled in the construction field.

We have an elected board consisting of President, 1st Vice President, 2nd Vice President, Secretary, five Directors, an appointed Treasurer and a Past President.

Committees include Contractor Regulation, Disaster Mitigation, Communications, Legislative, Membership, Public Relations, Standardization, Storage/History, Code Change/Code Development, Program, Corporate Affairs/Bylaws and Education.

Bi-monthly training meetings are held at various locations around the state.

Membership promotes and supports the ideals of the International Code Council. It's also a great way to participate in professional networking.

Join today and become a part of a professional organization engaged in the administration of codes, laws and ordinances related to building construction.

Applications available online at: [www.coloradochaptericc.org](http://www.coloradochaptericc.org)

## History

The Colorado Chapter has a long and industrious history. A meeting of Colorado Building Officials was held at the Park Lane Hotel in Denver on November 12, 1952 for the purpose of organizing a local Chapter of the Pacific Coast Building Officials Conference. The first meeting of the Colorado Chapter of the Pacific Coast Building Officials was held on January 23, 1953, and officers were elected.

Of course our current letterhead reads slightly different. We are now called Colorado Chapter, Inc. of the International Code Council to reflect the changed name of our umbrella organization after the consolidation of the three model code groups.

This Chapter was built by a group of extremely dedicated building code professionals. Countless volunteer hours have been spent by many people throughout the years to set up the framework and traditions of the Colorado Chapter.

We are proud of our history and look forward to moving forward with our progress into the 21st century with the same sort of dedication and professionalism from our Board members and our general membership.
